Mössbauer spectroscopy 229, 255, 277, 281
– conversive 361
Multilayered structures 347, 349, 351, 354, 357

Nanocrystalline alloys 249, 251, 257, 259, 266, 269, 271, 273, 275, 277, 279, 281, 284, 287, 295, 333
Nanocrystalline microwires 223
Nanocrystallization modelling 263
Neural networks 84
– performance predictions 81
Neutron diffraction 370, 382
Non-oriented silicon steel 133, 149
Nondestructive testing 43, 162
Nonlinear model 94
Numerical methods 5, 94

Orthoferrites 370

PdFe alloys 53
Permeability
– frequency dependence 245, 311
– tensor 17
Power converter 49
Power supplies 323
Preisach model 51, 87

Radiation defects 361
Random bond model 372
Reheating temperature 98
Reluctivity tensor 73
Residual magnetism 177
Resistivity 297
Reversible processes 87
Rotational magnetic field 174

Scanning electron microscopy 189
Secondary recrystallization 98, 127, 131
Sensors 199
– magnetic 197
– magnetoelastic 233
– magnetoresistive 162
– special 77
Sheet testers 65, 119, 171, 174, 177, 180, 183
6.5% Si steel 109, 315
Siliconizing 109
Single phase motors 75
Sn addition 289
Solid state reaction 351
Spin glasses 382
Staircase voltage 185
Stray flux 203
Stress
– compressive 57
– magnetization curve 59
– relaxation 291
– tensile 57
Surface
– magnetic properties 157, 333
– treatment 287

Testing device 165
Texture 133
– {100}⟨001⟩ 102
– cubic 125
– film 338
– Goss 127, 129, 143
Thermoelectric properties 239
Thermomechanical treatment 307
Thermostimulated conduction current 361
Thin films 21, 338, 341, 345
Thin layers 333
Transformation kinetics 266
Transformer 81
– core noise 38, 205, 207
– distribution 217
– modelling 79
– separating 215
– single phase 61
– three phase amorphous 77, 210
– wound core 61, 159
Two-dimensional magnetization 59
Two-dimensional modelling 71

Virtual instrumentation 154

X-ray diffraction 263, 357
